Professional Summary

Game Developer with hands-on experience in Unity, backend systems, and cross-platform SDK development. Proven ability to build and integrate authentication systems, wallet features, and leaderboards using Nakama. Experienced in debugging complex issues, publishing SDKs, and working across multiple platforms including C++, Godot, Defold, and Unreal.

Experience

Toba Tech Solution — Jr Game Developer (Feb 2026 – Present)

- Developed and maintained multi-platform SDKs.
- Integrated backend systems using Nakama (auth, wallet, leaderboard).
- Fixed RPC errors, session handling, and authentication bugs.
- Published SDKs across GitHub and itch.io.
- Built and debugged complete authentication flows.

Projects

CricketX – Multiplayer, Backend integration, wallet, leaderboard, ads, analytics, UI Toolkit, Native Sharing

ColorCrush2D – Backend integration, wallet, leaderboard, ads

Level Rotator – Gameplay systems, crash fixes

Galaxy Strike – Space shooter

Run King Run – Endless runner

Robo Hunt – FPS shooter

Maze Bunker – Horror survival

SDK- There are 8 SDKs which are production ready and needs Fixes so I contribute in error fixes build Issues and Publish them in different platforms

Unity SDK, Unreal SDK, Godot SDK, C++ SDK, Java SDK, Javascript/Typescript SDK, Defold SDK, Cocos2dx SDK

Skills

C#, C++, Python

Unity, Nakama, REST APIs, RPC

Git, Visual Studio, Blender

Debugging, SDK Development, Backend Integration

Codex, Claude, Kimi CLI, Antigravity, MCP
