PROFESSIONAL SUMMARY

Entry-level Game Developer and SDK Engineer with production experience shipping cross-platform SDKs across 8 game engines (Unity, Unreal, Godot, C++, Java, JS/TS, Defold, Cocos2dx). Experienced in Nakama backend integration (authentication, wallet, leaderboard, RPC), Android/iOS deployment, and building automated build-profile systems for 50+ playable ads. Personal projects have reached 100K+ total downloads. Strong debugging and QA background with CI/CD via GitHub Actions. Open to international remote roles.

EXPERIENCE

Junior Game Developer & SDK Engineer | Toba Tech Solution

Feb 2026 – Present

- Developed, debugged, and published 8 production-ready cross-platform SDKs (Unity, Unreal, Godot, C++, Java, JS/TS, Defold, Cocos2dx) to GitHub and itch.io.
- Built a custom Playable Ad Toolkit supporting 50+ playables — engineers select a build profile and SDK code is injected automatically via debug symbols; game validators and contracts check builds before shipping.
- Shipped playable ads to 10+ advertising platforms using the automated pipeline, reducing manual integration errors.
- Integrated Nakama backend systems including authentication flows, wallet, leaderboard, and RPC across multiple live titles.
- Resolved critical RPC errors, session handling bugs, and authentication failures in production.
- Performed QA testing, bug fixing, and UI fixes on QuizVerse — a flagship title with 100K+ downloads.
- Integrated AdMob, Unity Ads, analytics, native sharing, and UI Toolkit into live mobile games (CricketX, ColorCrush2D).
